Write Com	mands		
task	add	<mods></mods>	Adds a new task
task <f< th=""><th>ilter> annotate</th><th><mods></mods></th><th>Adds an annotation to an existing task</th></f<>	ilter> annotate	<mods></mods>	Adds an annotation to an existing task
task <f< th=""><th>ilter> append</th><th><mods></mods></th><th>Appends text to an existing task descrip</th></f<>	ilter> append	<mods></mods>	Appends text to an existing task descrip
task <f< th=""><th>ilter> delete</th><th><mods></mods></th><th>Deletes the specified task</th></f<>	ilter> delete	<mods></mods>	Deletes the specified task
	task task <f task <f< th=""><th></th><th><pre>task add <mods> task <filter> annotate <mods> task <filter> append <mods></mods></filter></mods></filter></mods></pre></th></f<></f 		<pre>task add <mods> task <filter> annotate <mods> task <filter> append <mods></mods></filter></mods></filter></mods></pre>

isting task description Deletes an annotation task <filter> denotate <pattern> Marks the specified task as completed task <filter> done <mods> Duplicates the specified tasks task <filter> duplicate <mods> task <filter> edit Launches an editor to modify a task directly Adds a new task that is already completed task log <mods> task <filter> modify <mods> Modifies the existing task with provided arguments Prepends text to an existing task description task <filter> prepend <mods> Marks specified task as started task <filter> start <mods>

Removes the 'start' time from a task

task <filter> stop

Read C	commands		
task			Runs rc.default.command, if specified.
task	<filter></filter>	active	Lists active tasks
task	<filter></filter>	all	Lists all pending and completed tasks
task	<filter></filter>	blocked	Lists all blocked tasks
task	<filter></filter>	burndown.daily	Shows a graphical burndown chart, by day
task	<filter></filter>	burndown.monthly	Shows a graphical burndown chart, by month
task	<filter></filter>	burndown.weekly	Shows a graphical burndown chart, by week
task		calendar [due month year]	Shows a calendar, with due tasks marked.
		completed	Lists completed tasks
	<filter></filter>		Counts matching tasks
	<filter></filter>		Exports tasks in JSON format
		ghistory.annual	Shows a graphical report of task history, by year
		ghistory.monthly	Shows a graphical report of task history, by month
		history.annual	Shows a report of task history, by year
		history.monthly	Shows a report of task history, by month
	<filter></filter>		Shows the IDs of matching tasks, as a range
		information	Shows all data and metadata
	<filter></filter>		Lists all pending tasks
	<filter></filter>	3	Lists all pending tasks
	<filter></filter>		Minimal listing of all pending tasks
	<filter></filter>		A really minimal listing
	<filter></filter>		Shows the newest tasks
	<filter></filter>		Lists the most urgent tasks
	<filter></filter>		Shows the oldest tasks
	<filter></filter>		Lists overdue tasks
	<filter></filter>		Shows all project names used
		recurring	Lists recurring tasks
	<filter></filter>		Shows task database statistics
	<filter></filter>		Shows a report of task status by project
	<filter></filter>		Shows a list of all tags used
task		timesheet [weeks]	Weekly summary of completed and started tasks
		unblocked	Lists all unblocked tasks
task	<filter></filter>	waiting	Lists all waiting tasks

Miscellaneous Commands

task	colors [sample legend]	All colors, a sample, or a legend
task	columns	All supported columns and formatting styles
task	config [name [value '']]	Change settings in the task configuration
task	diagnostics	Platform, build and environment details
task	execute <external command=""></external>	Executes external commands and scripts
task	help	Displays this usage help text
task	<pre>import <file> [<file>]</file></file></pre>	
task	logo	Displays the Taskwarrior logo
task	reports	Lists all supported reports
task	shell	Launches an interactive shell
task	show [all substring]	Shows all configuration variables or subset
task	undo	Reverts the most recent change to a task
task	version	Shows the taskwarrior version number

Synch Commands

task merge URL	Merges the remote files with the local files
task pull URL	Pulls remote files from the URL
task push URL	Pushes the local files to the URL
task synchronize	Synchronizes data with the Task Server

A <filter> is zero or more restrictions on tasks

task	<command/>	<mods></mods>
task 28	<command/>	<mods></mods>
task +weekend	<command/>	<mods></mods>
task project:Home due.before:today	<command/>	<mods></mods>
task ebeeab00-ccf8-464b-8b58-f7f2d606edfb	<command/>	<mods></mods>

Filters combine with 'and', but 'or' and 'xor' may be used with parentheses <command> <mods> task '(/[Cc]at|[Dd]og/ or /[0-9]+/)'

Filters may target specific tasks using ID or LILIID numbers

fillers may larger specific tasks using iD or obid humi	Jeis
task 1,2,3	delete
task 1-3	info
task 1,2-5,19	modify pri:H
task 4-7 obooab00-ccf8-464b-8b58-f7f2d606odfb	info

The <mods> consist of zero or more changes to apply to the tasks

```
task <filter> <command> project:Home
task <filter> <command> +weekend +garden due:tomorrow
task <filter> <command> Description/annotation text
```

Tags are arbitrary words

```
+tag
         The + means add the tag
          The - means remove the tag
```

Alternately algebraic expressions support

,	iatoi	<i>y</i> 4.5	,00.0	110 0	(pi coo	one cap		
and	d o	r x	or			Logical	l oper	rators
<	<=	=	!=	>=	>	Relatio	onal o	perators
+	-					Additio	on, su	btraction
!						Inversi	ion	
~	! ~					Match,	no ma	atch
()					Precede	ence	
tas	sk di	ue.b	efor	e:ec	m pri	ority.no	ot:L	list
tas	sk '	(due	< ∈	om c	r pri	ority !=	= L)'	list

The default .taskrc file can be overridden

task	 rc: <alternate file=""></alternate>	
task	rc.~/ alt taskrc	

The values in .taskrc (or alternate) can be overridden

task	rc. <name>=<value></value></name>	
task	rc.color=off list	

Any command or attribute name may be abbreviated if unique

```
task list project:Home
task li
            pro:Home
```

Some task descriptions need to be escaped because of the shell

```
task add "quoted ' quote"
task add escaped \' quote
```

The -- treats all other args as description, no matter what task add -- project: Home needs scheduling

Many characters have special meaning to the shell, including: $\$! ' " () ; \ ` * ? { } [] <> | & % # ~
